Explore more mountains than any mountaineer! PeakFinder makes it possible… and shows the names of all mountains and peaks with a 360° panorama display.
This functions completely offline - and worldwide!

SEEK IS CREATED BY INATURALIST

SEEK BY INATURALIST

Seek allows curious naturalists of all ages to earn badges and participate in challenges to observe organisms with on-screen identification using computer vision for identifications based on data from iNaturalist.

- Best choice if you do not want to create an account or share data, or are just getting started exploring nature
- No login or account required, kid-safe
- Seek's identification model provides an identification in real-time on screen
- This identification does not leave your device or require an internet connection to work
- Users aged 13+ or with parent's permission can optionally log in with their iNaturalist account and post observations to iNaturalist thorugh Seek
- No personally identifiable information is collected from users who do not log in with their iNaturalist account

INATURALIST

iNaturalist is an online community that allows you to share observations to discuss, identify, and create research-quality citizen science data for science and conservation.

- Best choice if you want to connect with others, share data, and are interested in natural history and contributing to citizen science
- Users must be 13 or older to make an account
- iNaturalist's identification model provides initial suggestions, but other people in the iNaturalist community help you identify and confirm your observations
- Records observations as biodiversity data that contribute to citizen science
- Photo, location, and time are recorded with each of your observations in the iNaturalist database

CornellLab
All About Birds

https://www.birds.cornell.edu/home/all-about-birds/

eBirds – The database powering the website and app.

All About Birds - https://www.allaboutbirds.org/news/, Cornell's website allowing you to research birds. Pulls data from the eBird Database

Merlin Bird App – App that can be used to assist with identification of birds. Uses data from the eBirds database to create matches and also adds data to the eBird database based on reported sightings.
